Frontend developer with 3 years of freelance experience building responsive websites for local businesses, sourced through his local frontend developer community, alongside a strong foundation in React JS, JavaScript, and modern UI development. Hands-on ethical hacking training (CEHv12) brings a security-conscious approach to building web applications. Quick to pick up new tools and frameworks, and actively expanding into TypeScript and full-stack development.

EXPERIENCE

Freelance Frontend Developer — Independent / Local Business Clients

2023 – Present

Take on freelance frontend projects sourced through a local frontend developer community, building and improving responsive websites for small local businesses. Handle everything from UI implementation to responsive layout fixes, working directly with business owners to translate their needs into working sites.

PROJECTS

Laundry Cart – E-Commerce Shopping Cart

laundryprojectafshan.netlify.app

Built a full shopping-cart flow in vanilla JavaScript with add/remove/quantity logic and dynamic price calculation; integrated EmailJS to handle order submissions without a backend.

Notes App – React + Tailwind

notes-app-reactjs-byafshan.netlify.app

Developed a sticky-note style notes application using React hooks for state management and Tailwind CSS for a responsive, mobile-friendly layout.

Job Card – React Props & State

jobcardproject.netlify.app

Built a component-driven React app to practice props/state architecture and reusable UI patterns.
