

# AFSHAN THAYAB KHAN

Frontend Developer | Full-Stack Developer | Software Engineer

Delhi, India | +91 93689 49953 | afshankhanyt0004@gmail.com | github.com/thafshan | linkedin.com/in/iamafshaaan/ | thafshan-portfolio.netlify.app/

## PROFESSIONAL SUMMARY

Frontend and Full-stack developer with 3+ years of freelance frontend development experience and hands-on experience building modern web applications and backend services. Skilled in JavaScript, React.js, TypeScript, Node.js, Express.js, Python, FastAPI, REST APIs, MongoDB, PostgreSQL and SQL. Experienced in responsive UI development, CRUD applications, API integration, database-backed systems, Git workflows and software engineering projects. Cybersecurity training in ethical hacking, web application security and networking, with an interest in secure and maintainable software development. Seeking Frontend Developer, Full-Stack Developer or Software Engineer opportunities.

## TECHNICAL SKILLS

**Frontend:** HTML5, CSS3, JavaScript, TypeScript, React.js, Redux, Tailwind CSS, Vite, Responsive UI

**Databases:** SQL, PostgreSQL, MongoDB, MongoDB Atlas, SQLAlchemy, Mongoose, Alembic, Data Modeling

**Cybersecurity:** Kali Linux, Nmap, Burp Suite, Wireshark, Metasploit, Nessus, OWASP Top 10, VAPT, Networking

**Backend:** Python, FastAPI, Node.js, Express.js, C#.NET, REST APIs, Socket.IO, Authentication

**Engineering:** Git, GitHub, npm, Postman, HTTP Clients, API Testing, CRUD, Debugging, Environment Configuration

**Core:** OOP Concepts, Database Design, API Architecture, Version Control, Problem Solving, Secure Development

## ENGINEERING HIGHLIGHTS

**Frontend Development:** Component-based React development, state management, responsive layouts, reusable UI, form handling and client-side interactions.

**Database Engineering:** Relational and document databases, schema design, ORM usage, CRUD workflows, indexing concepts and migration management.

**API & Testing:** Postman collections, HTTP methods, status codes, request/response validation, API troubleshooting and basic automated testing with xUnit.

**Backend Development:** RESTful service design, route/controller structure, request validation, authentication flows, middleware and API integration.

**Software Practices:** Modular project structure, environment variables, debugging, dependency management, Git branching, documentation and deployment.

**Security Mindset:** OWASP Top 10 awareness, web application testing, network fundamentals, secure authentication concepts and security-focused project development.

## EXPERIENCE

### Frontend Developer / Freelancer

Mar 2023 – Present

Remote · India

- Develop responsive websites and user interfaces for local businesses using HTML, CSS, JavaScript and modern frontend practices.
- Build reusable UI components, responsive layouts and interactive functionality with emphasis on usability and maintainable code.
- Expanded into full-stack development through projects using React, Node.js, Express.js, MongoDB, REST APIs and Tailwind CSS.
- Use Git/GitHub, deployment platforms and API integrations while independently handling development requirements and project delivery.
- Translate business and client requirements into practical frontend solutions, troubleshoot UI issues and refine implementations based on feedback.
- Maintain focus on performance, responsive behavior, clean structure and consistent user experience across desktop and mobile screen sizes.

## SELECTED PROJECTS

### SentinelOps — Full-Stack Security Operations Platform

2026

Python · FastAPI · PostgreSQL · SQL · SQLAlchemy · Alembic · Pyscopg · REST APIs · Uvicorn

Built a security-focused application combining software engineering and cybersecurity concepts. Implemented a Python/FastAPI backend, PostgreSQL database, SQLAlchemy ORM, Alembic migrations, user data modeling, environment configuration, structured backend modules, database migrations and REST API foundations.

Live: [sentinelopss.netlify.app/](https://sentinelopss.netlify.app/) GitHub: [github.com/thafshan/SentinelOps](https://github.com/thafshan/SentinelOps)

### Uber Clone — Full-Stack Ride Booking Application

2025–2026

React · Vite · Node.js · Express · MongoDB · Mongoose · Socket.IO · JWT · bcrypt · Tailwind CSS · Google Maps

Developed a full-stack ride-booking application with authentication, captain management, REST APIs, MongoDB persistence, real-time communication and ride workflow functionality, API-driven data flow and real-time event handling.

Live: <https://uberclone.netlify.app/> GitHub: <https://github.com/thafshan/uberClone>

### MERN To-Do List — Full-Stack Web Application

2025

React · Node.js · Express · MongoDB · Mongoose · Axios · Tailwind CSS

Built a task management application implementing complete CRUD operations, task completion, editing, deletion, REST API integration, MongoDB persistence, reusable components and client-server data flow.

### GTAVI — Responsive Web Experience

2025

HTML · CSS · JavaScript · Responsive Web Design · Netlify · Git/GitHub

Developed and deployed a responsive web experience focused on structured layouts, visual presentation, interactive frontend behavior and cross-device usability.

Live: <https://gtavithafshan.netlify.app/> GitHub: <https://github.com/thafshan/GTAVI>

### Commonwealth Bank Software Engineering Job Simulation — Forage

Sep 2026

C#.NET · MongoDB · React · Redux · TypeScript · Postman · xUnit · Git/GitHub · HTTP Clients

Completed a practical software engineering simulation involving backend development, frontend technologies, API testing, database integration, testing and version control.

## EDUCATION

### Bachelor of Computer Applications (BCA)

2023 – 2026

Amity University, Noida · Cloud & Security

## RELEVANT COURSEWORK

**Development:** Data Structures, OOP, Web Development, Software Engineering, REST APIs, Database Systems

**Security & Cloud:** Ethical Hacking, Network Security, Cryptography, Cloud Architecture, Information Security

## ADDITIONAL

**Deployment:** Netlify, Render, MongoDB Atlas

**Security Project:** Web Application Penetration Testing using Kali Linux Tools, OWASP Juice Shop

## CERTIFICATIONS

- Commonwealth Bank Software Engineering Job Simulation — Forage (2026)
- CEHV12 Practical — EC-Council
- Ethical Hacking & Countermeasures — Crow Security
- Cloud Architecture — TCS
- Cryptography — TCS
- Advanced Cyber Security – An Application Approach — TCS
- HackerRank React (Basic) & CSS (Basic)
